ENTOMOLOGY - PREP.

Forward

In 74 Nations thousands of scientists are investigating the diversity of nature and solving the perplexing problems of managing the World's forestry resources. Biologists, chemists, and specialists in many disciplines are employed by the 267 member organizations of the International Union of Forestry Research Organizations (IUFRO). One of the goals of the IUFRO is to improve the communications among these scientists. To achieve this goal IUFRO has supported the development of directories that identify scientists and their interests. The United States Forest Service has been especially helpful in producing these directories.

This is the third in a series of computer-based directories that has been financially supported by the United States Forest Service. This directory enters into computerized files, the names and special interests of scientists concerned with the many insects and diseases that occur in forests or that damage forest resources. It adds forest entomologists and pathologists and related specialists to the already existing files on geneticists, tree breeders, and tree physiologists.

These computer files, because they have been constructed in similar ways, can be cross searched to identify forest biologists having common interests. For example, this enables forest entomologists to identify tree breeders who might help to produce a resistant variety. As the number of directories expands to include more scientists in other disciplines, we will steadily improve the opportunities for scientists to communicate both with their peers and with those who are concerned about related problems.

Special thanks are due to the compilers of this directory and to the North Central Forest Experiment Station of the United States Forest Service. They have generously provided the expertise, clerical services, and computers to create this directory. Now that they have surmounted the problems of creating this directory, IUFRO hopes that they will be in a position to maintain and improve this directory.

A handwritten signature in cursive script, reading "R. Z. Callahan".

R. Z. CALLAHAN

Coordinator, Division 2, IUFRO

NOTE ON PREPARATION OF THE DIRECTORY

In the spring of 1974, questionnaires were sent to about 6,000 individuals whose names were found in all available directories known to us. Questionnaires were sent to every individual known to be or suspected of being a forest pathologist or entomologist. Many of the directories were several years old. Several did not clearly indicate which of the persons listed were forest pathologists or entomologists. They also provided very poor coverage for some countries. So recipients of the questionnaire were asked to help in getting responses from individuals not included in our list.

Replies have been gratifying. The responses were coded and punched on standard Hollerith cards. An IBM 360/20 computer was used to assemble the information and printed a draft of the DIRECTORY. The contents will be kept permanently on magnetic tape and, it is hoped, updated periodically. From this record we will be able to prepare lists of names and addresses by country, etc., on a CYBER 74 computer.

Computerization of the DIRECTORY has several advantages. It facilitates updating, correcting, and compiling lists of names and addresses of individuals by countries or subject matter areas. Printouts can be in the form of mailing labels.

This first draft of the DIRECTORY is considered merely a beginning. Doubtless many individuals are missing that should be included and errors have been made. Some of the errors could be in translation. For this we apologize.

A review draft was sent to the Second FAO/IUFRO World Technical Consultation on Forest Diseases and Insects, Delhi, India. To save time in getting this first draft reproduced and distributed, corrections made to the review draft have been inserted manually to the extent possible, instead of making a complete computer re-run. The review draft corrections will be entered in the magnetic tape and thus incorporated into any future computer printouts.

We ask that you examine this draft for the listing of names for your country and any other country you are familiar with, and send us the names and addresses of any individuals who are missing. We also request that you check your own listing and inform us of any errors. With good cooperation from the recipients of the first draft, a second draft can be developed that will provide more and better coverage of the World's forest pathologists and entomologists.

Cooperation received in developing the first draft has been gratifying. We especially appreciate the many recipients of questionnaires who have cooperated by obtaining responses from persons who were not on our mailing list.

We wish to thank the personnel of the Computer Center, St. Paul Campus, University of Minnesota, for their advice and efficient processing of the information. The facilities and substantial times of personnel provided by the North Central Forest Experiment Station, USDA Forest Service, St. Paul, Minnesota, are also much appreciated.

IUFRO Working Party, Subject Group S2.06.8

St. Paul, Minnesota 55108 USA

USE OF THE DIRECTORY

The DIRECTORY consists of six parts.

Alphabetic List Arranged by Nation - The nations are arranged in alphabetic order and under each nation individuals are arranged in alphabetic order by last name. When there is more than one individual with the same last name, first name arrangement is random. The names are numbered consecutively from 0001 to 1339. These numbers are used in cross referencing to other sections of the DIRECTORY or to identify individuals. Each number is followed by a letter or letters: "E" for entomologist, "P" for pathologist, and "EP" for interest or competence in both.

Each name and address is followed by: (1) a row of up to 4 numbers beginning with "0" indicating the tree genera in which the individual is interested, (2) a row of up to 4 numbers beginning with "1" indicating the pathogen genera in which the individual is interested, (3) a row of up to 4 numbers beginning with "2" indicating the insect genera interests, and (4) a row of up to 10 numbers beginning with "3" or "4" showing subject matter interests. The DIRECTORY sections on genera and subject matter interests follow the list of names.

Some names and addresses were received too late for inclusion in the computer printouts. They follow at the end of the main list and are not included in other sections of the DIRECTORY.

Tree Genera Index - Tree genera are listed alphabetically and each one has an assigned code number beginning with "0". Under each genus are listed by nation the numbers referring to the individuals interested in that particular genus.

Pathogen and Insect Genera Indices - These two sections are handled in the same manner as described for tree genera. The code numbers for pathogens begin with "1" and those for insects with "2". In a few cases taxonomic rank higher than genera are included.

Subject Matter Index - This section is handled in the same general manner as described for tree genera with code numbers beginning with "3" or "4". Subject matter interests are listed and described under 17 broad categories with code numbers ending "00". Under most of these, several more specific subject matter areas are listed.

Alphabetic Index - The last section of the DIRECTORY is an alphabetic list of all names included and the code number assigned to each.

THE DIRECTORY AND FUTURE MAILING

The cards used in printing the DIRECTORY are being stored and can be used in future computer processing of information in the DIRECTORY, including printing of gummed mailing labels. Any organization or individual wishing to obtain such labels for any or all the nations listed should contact: Dr. Harold O. Batzer, North Central Forest Experiment Station, USDA Forest Service, Folwell Avenue, St. Paul, Minnesota 55108 USA.

The labels will be furnished at cost which in March 1975 was \$40.00 (U.S.) for a complete set of 1,339 labels.
